

CONSTRUCTION ANNOUNCEMENT-10

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 10 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 31 May-04 June, the following streets/areas will be impacted by construction:

A-Street- Middle School to SR-282: Continued disruption due to asphalt patching and resurfacing.

Southwest Area- 18th to 3rd: Grinding of the roadway and installation of mainline throughout the area. Crews will generally move from the south to north.

Swanson Addition: Final installations and asphalt patching on most streets.

Due to recent weather, area asphalt plants have changed their schedules. This could result in delays or other modifications to this information. Call City Hall for up to the minute details.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
