

CONSTRUCTION ANNOUNCEMENT-13

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 13 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 21-25 June, the following streets/areas will be impacted by construction:

Southwest Area: Grinding of the roadway and installation of mainline on C-Street and 10th-13th Avenues. Crews will generally move from the south to the north.

Swanson Addition: Continued pouring of concrete pads around meters and hydrants, street pulverizing, and final clean up before asphalt arrives.

A-Street south of Middle School: Pulverizing of roadway prior to paving.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
