

CONSTRUCTION ANNOUNCEMENT-16

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 16 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 12-16 July, all of the following streets/areas will be impacted by construction:

Southwest Area: Continued grinding of the roadway and installation of mainlines on 10th Avenue SW; service line work on 11th-13th Avenues SW, and C-Street SW.

Swanson Addition and A-Street: Pouring of curbing on Orchard, Thurston, and A-Streets, and final shaping of the roadway for asphalt. One section of mainline will be installed near SR-283, necessitating closure of A-Street for one day.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
