

CONSTRUCTION ANNOUNCEMENT-17

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 17 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 19-23 July, all of the following streets/areas will be impacted by construction:

Southwest Area: Continued grinding of the roadway and installation of service lines on C-Street SW; from the 900 block towards the 700 block.

Swanson Addition and A-Street: Final preparation of the roadway for asphalt. Paving could begin as early as Tuesday. Drivers should be alert for closures.

Basin Summer Sounds (16-17 July) will also close streets in the downtown area. Please refer to the City's website, or the Grant County Journal for maps and more information.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
