

CONSTRUCTION ANNOUNCEMENT-20

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 20 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 09-13 August, all of the following streets/areas will be impacted by construction:

Southwest Area: Continued grinding of the roadway and installation of service lines on, or near, D-Street, 5th Avenue, and Parkway SW. Meter boxes and pads will be fitted on C-Street. Watch for temporary closures and intermittent water interruptions.

Residents may see air in their waterlines during the construction process due to flushing. This is normal and will continue until the work is completed.

Swanson Addition and A-Street: Raising of all utility covers, monuments, and valves.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
