

CONSTRUCTION ANNOUNCEMENT-3

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 3 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 12-16 April, the project will continue on A-Street, and then move into the Swanson Addition area.

Installation of the water main on A-Street SE will continue from Pioneer Street and proceed South towards Highway 282. All streets in Swanson Addition will likewise be affected, as crews install mainlines throughout the neighborhood.

A-Street construction will occasionally block the Northbound (Middle School side) lane of A-Street SE. All drivers should avoid this area, if possible, until the 16th of April.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
