

CONSTRUCTION ANNOUNCEMENT-7

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 7 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 10-14 May, all streets in Swanson Addition will be impacted as mainline installation is completed. A second crew will install hydrants and catch-basins, charge lines, and install service lines behind the main team. Flushing of lines will take place throughout the area, and preparation for asphalt patching could begin before the end of the week.

A-Street construction may still occasionally block the Northbound (Middle School side) lane of A-Street SE.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
