

CONSTRUCTION ANNOUNCEMENT-8

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 8 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 17-21 May, all streets in Swanson Addition will be impacted as crews install hydrants, catch basins; charge lines, and install service lines. Flushing of lines will take place throughout the area.

Construction may still occasionally block A-Street SE, primarily from Pioneer to SR-282.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. **Cars not off the street shall be towed at the owner's expense.**

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
