

FIRST CONSTRUCTION ANNOUNCEMENT

Phase-III of the Ephrata Waterline & Street Replacement Project is beginning week 1 of 24. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and failing streets.

Next week, 29 March-02 April, the project will commence.

Mainline installation on one side of A-Street SE will begin Monday 29 March at Nat Washington Way and proceed South towards Highway 282.

Construction will completely block the Northbound (Middle School side) lane of A-Street SE. All drivers should avoid this area, if possible, until the 15th of April.

Local access will be maintained, including to the Middle School, during this portion of the Project.

However, traffic delays will be extreme during the Middle School student drop-off time, mornings and afternoons. Avoid using A-Street SE during these times.

Crews from Advanced Excavation will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

All cars will need to stay off of these streets until construction crews reopen the roadway. Cars not off the street shall be towed at the owner's expense.

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
