

FINAL CONSTRUCTION ANNOUNCEMENT

Phase-II of the Ephrata Waterline & Street Replacement Project has reached week 20 of 20. This four-year, \$10-million dollar project will replace 24-miles of aging waterlines and streets.

Watts Construction crews will continue to pour pads and finish final installation, of monuments and the like, throughout the area.

There will be occasional work on all streets as valves and manholes are brought back up to grade.

Crews from Watts Construction will generally work a 4-10 schedule; work starting at 7:00am and ending at 5:30pm, Monday-Thursday.

The City of Ephrata and Watts Construction thanks each of you that endured this year's construction. Your patience and politeness were appreciated greatly.

Construction will commence next Spring, with Phase-III in the Southwest section of Ephrata.

If we all cooperate together, our new waterlines and beautiful new streets will be finished on time, and under budget. If you have questions at any time, contact City Hall at 754-4601.

Information, construction schedules, and feedback forms, including photos of the project, are available at www.ephrata.org.
